

Q1. What are the main components of a computer system?  
A1. The main components of a computer system are the hardware and software. Hardware includes the monitor, keyboard, mouse, and system unit. Software includes the operating system, applications, and data.

Q2. What is the difference between hardware and software?  
A2. Hardware is the physical part of a computer system, while software is the set of instructions that tell the hardware what to do.
